EYE STANDARD EN 172:1994 +A1:2000 + A2:2001

These impact resistant goggles are made of smoked grey polycarbonate. They have a non-slip PVC bridge, matte black frame, tilt and adjustable length. Their wrap-around panoramic sports design can be used in other applications. They are recommended for all types of work where there is a risk of material chipping, as well as those requiring protection against strong luminosity and annoying ultraviolet (UV) light.
