Equipment Installation

The XMD drivers should be installed and operated by a competent electrician, technician or engineer. Improper installation and use of these products can result in significant threat to both individuals and equipment. In the event of an equipment breakdown, do not attempt to repair the driver as there are no user-serviceable parts inside the product. Evidence of tampering will invalidate the warranty.

Installation Bracket

Notes:

- 1) Use size 16 contact sockets for wire sizes: 16, 18, and 20 AWG.
- 2) Use crimp tool: HDT-48-00
- 3) Compatible with any DT06-12SA-XXX mating connector
- 4) Preferred mating connectors:
 - DT06-12SA
 - DT06-12SA-P012
- 5) Use standard Deutsch back shell for IP69K rating, DT12S-BT

Recommended Wiring Practices:

- 1) For best grounding practices, isolate pin 7, supply ground, from pins 3 and 5, command, +5Vdc reference, and output grounds.
- 2) Use twisted or twisted shielded-pair cable for CAN per the applicable standard.
- 3) Confirm that the CAN network is properly terminated using 120-Ω resistors.
- 4) Make certain that the harness is designed and constructed to minimize induced interference resulting from EMI coupling between signal wires.
- 5) Keep high-voltage AC cables separate from low-voltage DC signal and supply cables.
- 6) Check ALL wire connections to and from this unit to ensure NO short or open circuits are present.
- 7) Ensure that any unused wires/connections are terminated safely and not shorted together.
- 8) Isolate the amplifier if any battery charging or battery boosting takes place on the installation.
- 9) Follow and abide by all applicable health and safety standards – protect yourself and others.
- 10) Never disconnect or connect wires to or from this unit unless it is isolated from the power supply.
- 11) Use best practice wiring standards

Mechanical Installation:

The controller should be mounted on a flat surface. Provide sufficient clearance from moving parts.

- 1) Recommend mounting hardware: #8-32 x 1/2 T18-8 stainless screws, suggested torque 22 in-lbf
- 2) Do not mount in a location that will result in ambient temperatures greater than specified operational temperature limits.
- 3) The XMD is compatible with standard 35-mm DIN Rail.

Warning: Prior to welding

In order to avoid damage to the product, ensure that all electrical connections are fully disconnected from the XMD driver prior to welding on the machine.
