

## ► Easyflex®

Originally designed for easy assembly by re-sellers looking to extend their product portfolio. Easyflex® has a 'true' I/D and eliminates the need to de-convolute the hose when using standard hydraulic inserts. Used in applications where constant flexing, high temperatures or chemical resistance is paramount the Easyflex® hose offers a cost effective solution over the full life of the hose.

## Properties

### Application

Used globally in low to medium pressure premium applications that require more flexibility or tighter bend radius whilst still requiring the high temperature and impeccable chemical resistance of the standard PTFE hose

### Design

Helically convoluted PTFE tube with high tensile SS 304 braid

### Inner layer

Helically convoluted PTFE tube

### Outer layer

High tensile 304 maypole wound Stainless Steel

### Temperature Min

-60°C

### Temperature Max

+260°C

### Material

PTFE according to "ISO12086, Part 1.  
PTFE-E.P.D.M 1.6.1.C.E.4\_12"

## Easyflex® Range

	Part Number	Description	Tube Wall Thickness Nom. (mm)	Tube Wall Thickness Nom. ## Note

Antistatic liners are available for Easyflex for when electrically resistive fluids are being transferred at high flow rates.

Also available with acid resistant 316 SS.
