

HPM4000

Hydraulic data logger

The HPM4000 is the ideal entry level product for hydraulic fault prevention and diagnostics. It enables a service engineer to connect either two or three sensors simultaneously, depending on the version, and display, data log and export results to HPMComm for further analysis. HPMComm is Windows compatible software that is included free-of-charge with all Webtec HPM devices.

The HPM4000 not only allows the user to display actual values, like flow, pressure and temperature but also display peak pressure, and calculate values such as differential pressure and hydraulic power.

The rugged handheld unit combines a 3 1/2" square backlit LCD with powerful data logging functionality, 1GB of memory on a nano-USB stick and full device/host USB compatibility.

You can build up your own service kit with your own choice of Webtec sensors, supplied with or without a flight case, or choose from two standard entry level kits.

Features

- **Complete** range of sensors – pressure, flow, temperature, tachometer
- **Intelligent** digital sensors (CAN protocol) for easier wiring and auto configuration (HPM4030 only)
- **Analogue** SR sensors with sensor recognition (HPM4020 only)
- **Large 3.5"** back-lit display for quick and easy readings
- **IP67** rated for use in extreme conditions (HPM4030)
