INNESTI MECCANICI SERIE 30100 - 30300 - 30500

Gli innesti meccanici di ns. produzione sono bidirezionali e unidirezionali. Nelle fasi di accoppiamento con le pompe oleodinamiche è importante effettuare l'operazione di innesto e disinnesto della pompa con la valvola direzionale in posizione di scarico ad una velocità non superiore a 1800 giri/1'. Nella versione reversibile la velocità massima di innesto e disinnesto è di 1000 giri/1'.

LUBRIFICAZIONE:

Olio tipo SAE 90.

Il cambio dell'olio deve essere effettuato ogni 12 mesi.

Temperatura max. d'esercizio = + 80°C.

EMBRAYAGES MÉCANIQUES SERIE 30100-30300-30500

Les embrayages que nous produisons sont bidirectionnels et unidirectionnels.

Lors de la phase de l'accouplement avec les pompes hydrauliques, il est important d'effectuer l'opération d'embrayage et de débrayage de la pompe avec la soupape directionnelle en position de décharge à une vitesse ne dépassant pas 1800 trs/mn.

Dans la version reversible, la vitesse maximum d'embrayage et de débrayage est de 1000 trs/mn.

LUBRIFICATION:

Huile type SAE 90.

La vidange de l'huile doit être effectuée tous les 12 mois.

Température maxi. d'exercice: + 80°C.

Température mini. d'exercice: -10°C.

MECHANICAL COUPLINGS SERIES 30100 - 30300 - 30500.

They are unidirectional and bidirectional.

When coupling with hydraulic pumps we recommend to engage and disengage the pump when the directional valve is in exhaust position at a speed not over 1800 R.P.M.

In the reversible position the max engagement and disengagement speed is 1000 R.P.M.

LUBRICATION

Oil type SAE 90.

Change oil every 12 months.

Max working temperature + 80°C

Min working temperature -10°C

MECHANISCHE KUPPLUNGEN SERIE 30100 - 30300 - 30500.

Unsere mechanischen Kupplungen arbeiten in einer Drehrichtung oder in beiden Drehrichtungen.

In der Kupplungsphase ist es bei Hydraulikpumpen besonders wichtig, daß das Ein- und Auskuppeln dann erfolgt, wenn das Sperrventil offen ist und die Drehgeschwindigkeit nicht über 1800/min-1 liegt.

In der Reversierausführung ist die max. Ein- und Auskupplungsgeschwindigkeit 1000/min-1.

SCHMIERUNG

SAE 90.

Der Ölwechsel muß alle 12 Monate erfolgen. Max. Betriebstemperatur: + 80°C.

Min. Betriebstemperatur: -10°C.
