

Mikalor SMS P-Clips are ideal for attaching and retaining cable conduits, hoses and tubes in construction, sanitary and particularly in automotive applications. They are widely used in agricultural machinery, boatbuilding, commercial vehicles, construction equipment, etc.

The anti-vibration EPDM rubber profile helps to hold pipes, hoses and conduits firmly in place without chafing or damage to the clamping area.

In contrast to DIN 3016 P-Clips, SMS P-Clips have one round hole and one oval hole. This unique feature allows for certain flexibility when fixing these clips in place.

MATERIAL:	W1 Steel
FINISH:	Galvanized
COATING:	Black EPDM rubber
CORROSION RESISTANCE:	144 hours Salt Spray (ASTM B-117)

Mikalor SMS P-Clips are available in two bandwidths. 12,7mm (with an M6 hole) and 15,9mm (with an M8 hole).

* Special diameters are available on request.

* Other types of rubber lining are also available.
