

R24

High flow pressure regulator

- Port size: G1/4 ... G1 1/4
- Exceptionally high flow and relief flow characteristics
- Easy to adjust even at high output pressures
- Balanced valve minimises effect of variations in inlet pressure on outlet pressure
- Relieving feature allows outlet pressure reduction even when the system is dead ended
- Full flow gauge ports
- Panel mounting facility
- Pilot operated version available

Technical features

Medium:
Compressed air

Maximum pressure:
20 bar (290 psi)

Pressure range:
0,3 ... 17 bar (4 ... 246 psi)

Port size:
1/4" ... 1 1/4"

Gauge ports:
See table below

Ambient/Media temperature:
0 ... +80°C (+32 ... +176°F)
supply must be dry enough to avoid ice formation at temperatures below +2°C (+35 °F).

Materials:
Body & bonnet: zinc alloy
Bottom plug & adjusting knob (manual): acetal resin
Main valve: brass/synthetic rubber
Elastomers: synthetic rubber

Technical data, standard models, relieving, without gauge

Symbol	Port size	Gauge port size	Pressure range (bar)	Weight (kg)	Model
	G1/4	G1/4	0,3 ... 17	0,73	R24-201-RNXG
	G3/8	G3/8	0,3 ... 17	0,70	R24-301-RNXG
	G1/2	G1/2	0,3 ... 17	0,68	R24-401-RNXG
	G3/4	G1/2	0,3 ... 17	1,18	R24-601-RNXG
	G1	G1/2	0,3 ... 17	1,18	R24-801-RNXG
	G1 1/4	G1/2	0,3 ... 17	1,14	R24-A01-RNXG
	G1/4	G1/4	0,7 ... 8	0,86	R24-200-RNLG
	G3/8	G3/8	0,7 ... 8	0,83	R24-300-RNLG
	G1/2	G1/2	0,7 ... 8	0,81	R24-400-RNLG
	G3/4	G1/2	0,7 ... 8	1,24	R24-600-RNLG
	G1	G1/2	0,7 ... 8	1,24	R24-800-RNLG
	G1 1/4	G1/2	0,7 ... 8	1,20	R24-A00-RNLG

Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under

»Technical features/data«.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems or other applications not within published specifications, consult IMI Precision Engineering, Norgren Inc.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes.

The system designer is warned to consider the failure modes of all component parts used in fluid power systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
