

# Multifaster product training

V01.2017

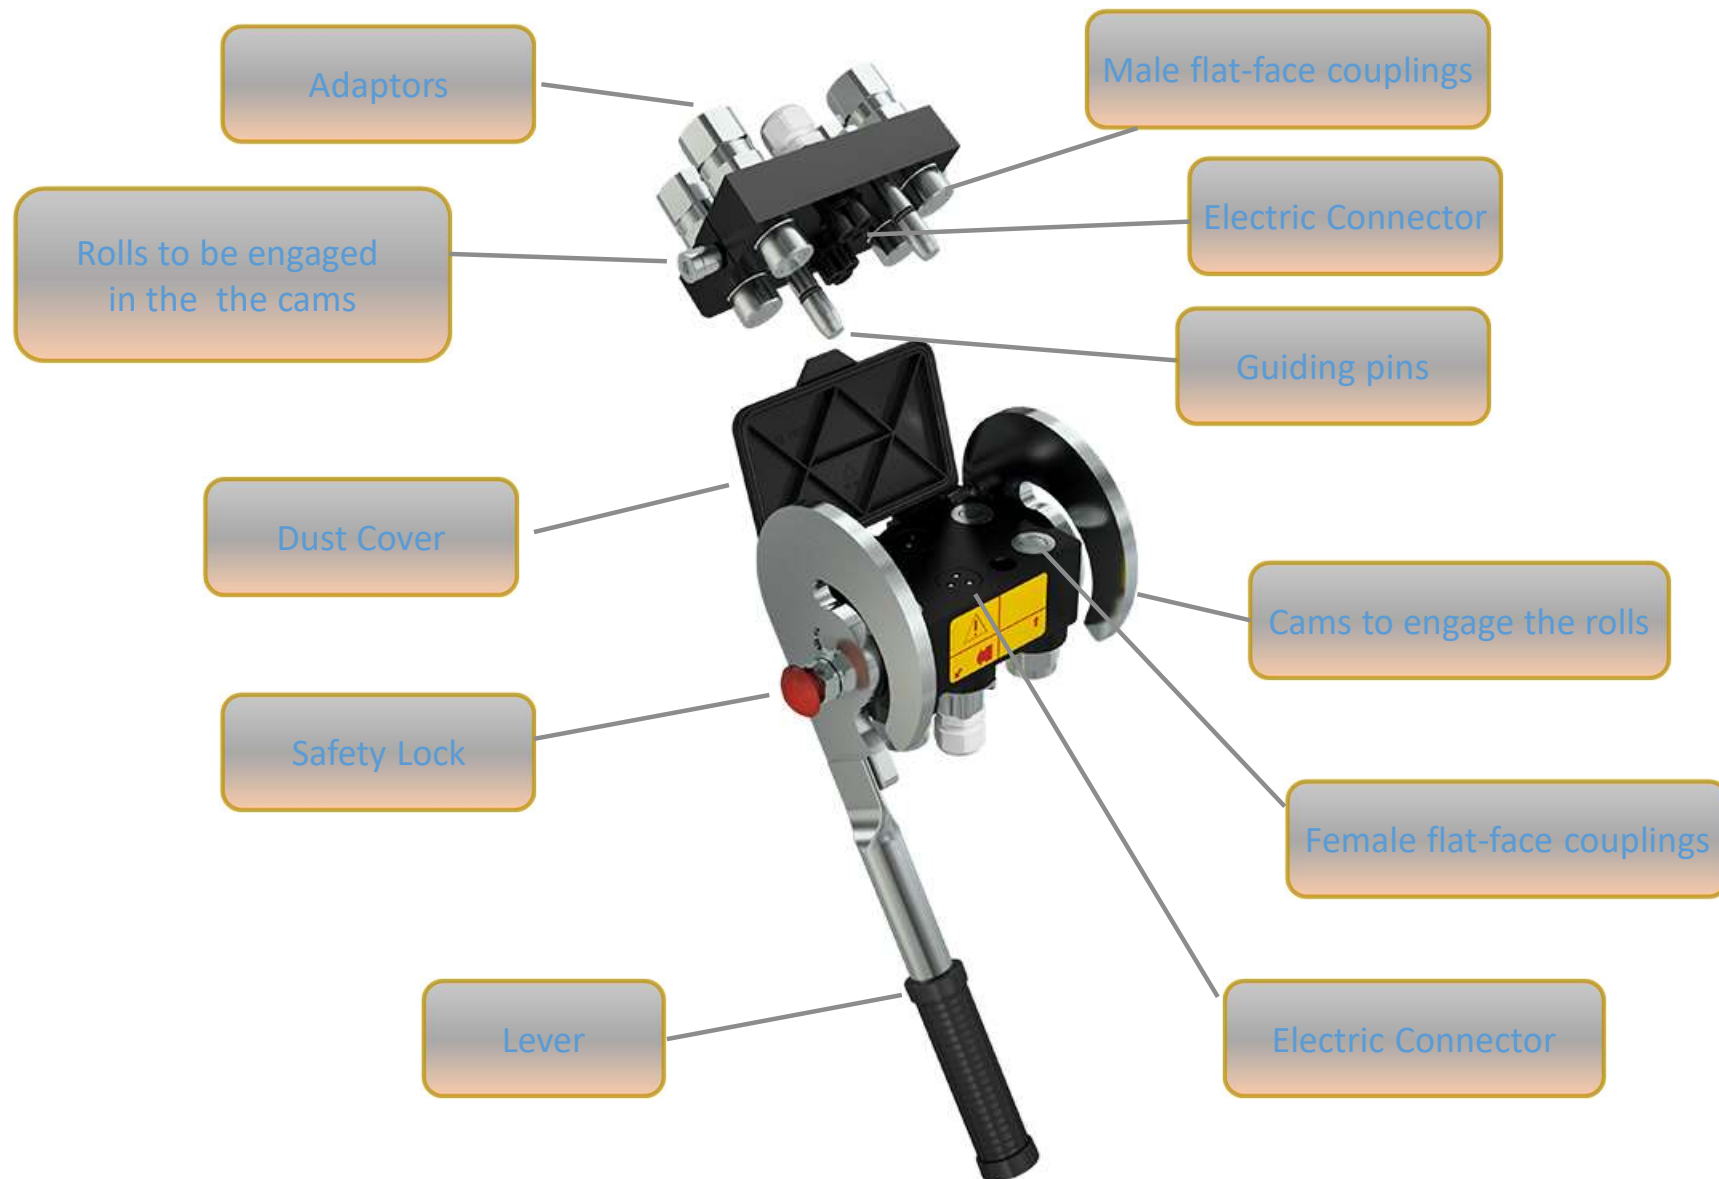

## Market reference to connect multiple lines

- In the '90s Faster launches this concept on the market and soon sets the reference
- Product evolution in terms of different combination of elements, such as number of lines, levers, electrical connectors...

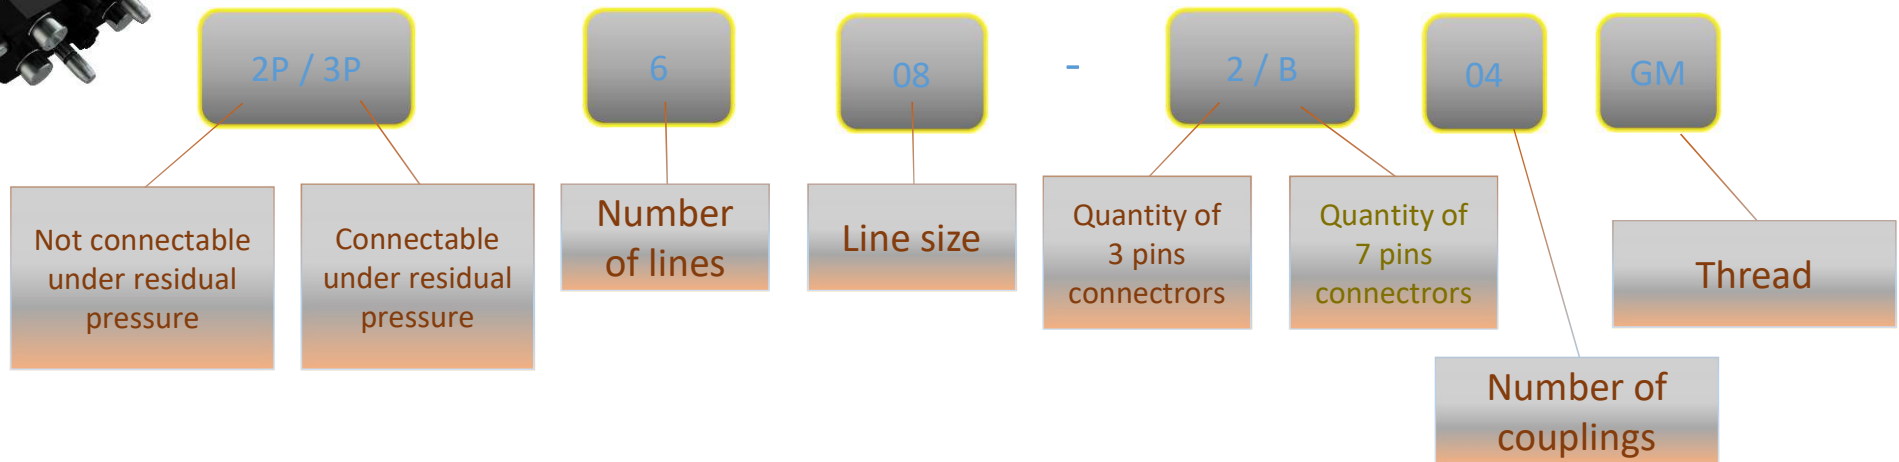

## Multifaster – how it is composed

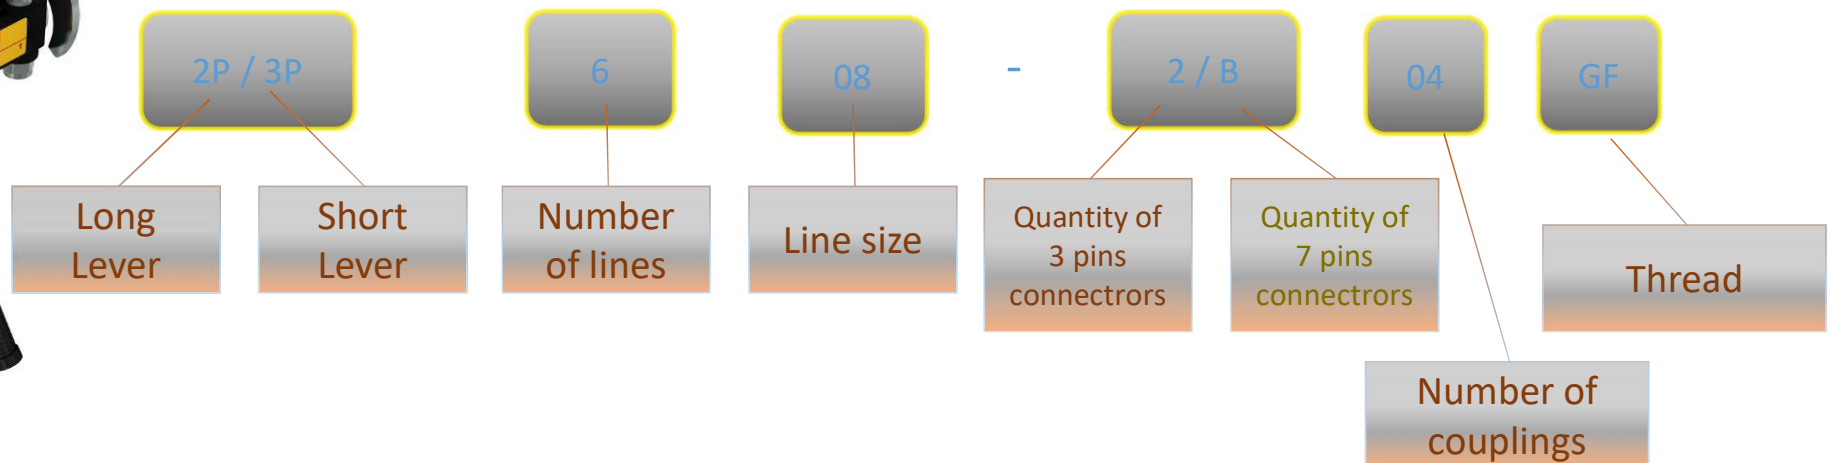

# Multifaster – general nomenclature rules

## ■ Mobile half

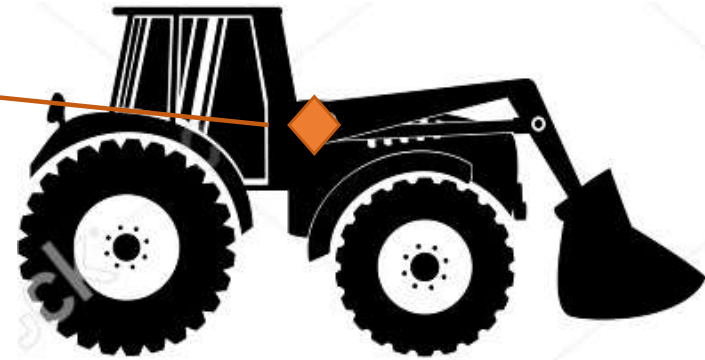

## ■ Fixed half

## Main application: front loaders

Usually 4 lines (attachments with 2 functions) or 6 lines (attachments with 3 functions). Multifaster is used mostly for this application.

Main application: front loaders

Some examples

# Multifaster for Harvester / Combine

Usually 5 lines for these functions:

- Reel Extend
- Reel Retract
- Reel Drive Forward
- Reel Drive Reverse
- Lift

# Application: Harvester / Combine

Some examples

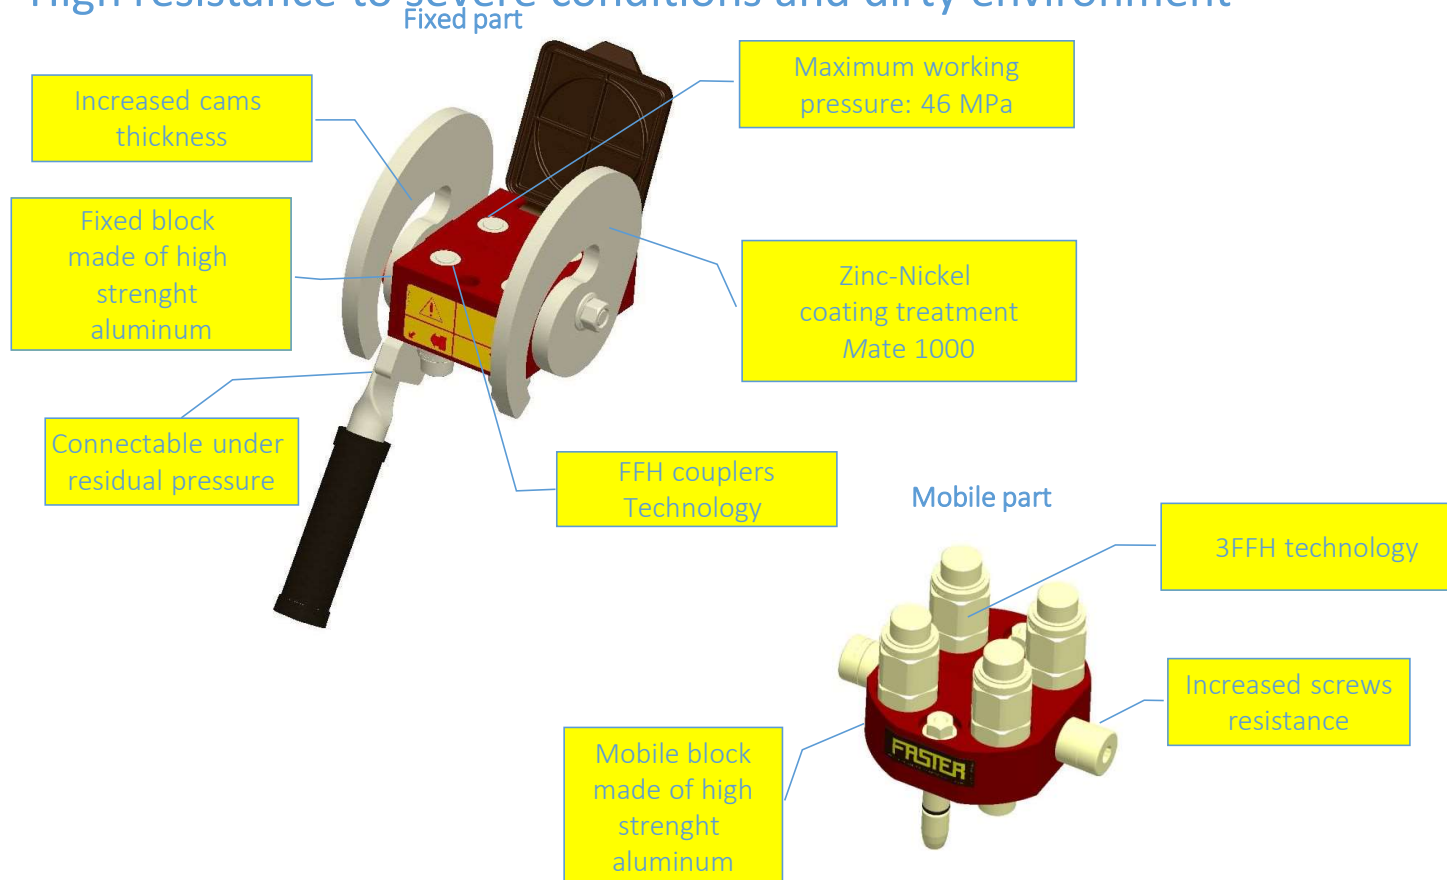

# Multifaster for heavy duty applications

## PH series

- Special for high pressure applications (46 MPa)
- Suitable to impulse pressure applications
- High resistance to severe conditions and dirty environment

Applications: AG)

CE

- Demolition machines
- Grapple cranes
- Heavy duty cranes
- Trailers
- Other special applications

# The range

## PH series – the range

- PH406 (4 hydraulic lines 3/8")
- PH 408 (4 " " 1/2")
- PH 510 (2 " " 1/2" + 2 lines 3/4")

## Applications:

CE

- Demolition machines
- Grapple cranes
- Heavy duty cranes
- Trailers
- Other special applications

Note: this item is not interchangeable with the equip Multifaster series
